

**Process. Search. Filter. Produce. Simple.**

# Intella On-Demand Basic Course

This is a self-paced online course that is designed to teach the user all of the basic functionality of Intella. After taking this course, the user will be able to run a variety of search criteria effectively, review results, create tags, and export to a number of different formats.

Access to this course on the training portal is valid for 30 days from the purchase date.

## **Training prerequisites:**

Note that this course is a prerequisite to the **Intella Advanced** course.

## Learning Objectives

### **Module 1: Introduction and Installation**

- Learn the core functions of Intella
- Gain insight into the company profile
- Where to get technical and community support
- Learn the value in reading metadata
- Installation process.

Upon completion of module 1 you will know the history of Vound, which hardware should be considered for installation and how to obtain support for your products.

### **Module 2: Case Creation & Processing Options**

- Creation of new Intella Case
- Pre-processing Options
- Adding Evidence items to the case
- Processing issues
- OCR options
- Handling Encrypted Items.

Upon completion of module 2 you will understand how to create a new case, and the pre-processing options available when indexing data into a case.

### **Module 3: Searching & Insight – Part 1**

- Review the Intella interface
- Explore data viewing options
- Learn basic keyword searching techniques
- Gain an introduction to Tagging
- Learn the Insight<sup>®</sup> tab and reviewing options
- Discuss Flagging options.

Upon completion of module 3 (part 1) you will be familiar with the Intella interface and the different controls for functionality. You will also be able to conduct basic searching techniques.

### **Module 3: Searching & Insight – Part 2**

- Learn the function of the Preview windows
- Explore best practices in review of data
- Explore the Facets pane and define each sections function
- Review Date and Times in Intella.

Upon completion of module 3 (part 2) you will be able to use the review window and its options. You will have an insight into some best practices and you will be able to utilise more powerful searches using the Facets feature.

#### Module 4: Visualizations

- Learn the function of Histograms
- Explorer the uses of the Social Graph feature
- Review the importance of Geolocation data
- Describe the uses of Email Threading
- Explore the Identities tab
- Learn how to create Identities and use for case analysis.

Upon completion of module 4 you will have a good understanding of how to use the different visualizations in Intella effectively. This includes reducing the number of emails to review by using the email threading feature.

#### Module 5: Exporting

- Explore export options
- Single items
- Multiple items
- Metadata Exports
- Facet Exports
- Load File Exports.

Upon completion of module 5 you will be able to export items and metadata from a case in a number of different formats.

#### Module 6: Administration Settings & Troubleshooting

- Review all the options in the Preferences Tab
- Learn common troubleshooting tips to identify issues with your case, data and licensing.

Upon completion of module 6 you will be able to configure the Intella interface so that it suits your workflow. You will also be able to troubleshoot issues with your cases, data and licensing dongles.

**Private and customized training is available – contact Vound for details.**

## Other Learning Options

### Live Training

During an extensive hands-on workshop, attendees will first learn of best practices in creating a case followed by exercises in data analysis using advanced features and workflows. Master the use of Intella in our TRAINING LAB.
