JUSTICE AT YOUR FINGERTIPS

Intella® was designed to make short work of the majority of matters a law firm or corporate counsel will encounter. Whether it is eDiscovery, compliance or simply searching your own data, Intella® is built to improve productivity.

USED WORLDWIDE

Vound's cost effective email investigation and eDiscovery software is quickly becoming the preferred tool for enterprise, professional service providers, law enforcement, government agencies and law firms worldwide to process, search and analyze Electronically Stored Information (ESI).

Vound's innovative, legally defensible and affordable electronic data investigation software, Intella®, is used worldwide to process, search and analyze Electronically Stored Information (ESI).

Did you know?

- 93% of all information in America is stored in electronic format (University of California at Berkeley)
- More than 70% of electronic information is never printed (American Records Management Association)

Intella® will help you find what you need, fast. An easy-to-use, visually-based review platform, Intella® streamlines data search and allows for multiple reviewers to work on multiple tasks simultaneously.

"Ease of use is everything to us... Our software is designed to produce quality results, regardless of the person's skill level."

Peter Mercer, CEO Vound Software

If your staff can use Google™ they can use Intella for:

- eDiscovery and Early Case Assessment (ECA)
- Detecting inappropriate email usage and information leakage
- Uncovering I.P. theft
- Investigating regulatory compliance
- Discovering insider trading

All Intella® products feature our unique Cluster Maps to help users visualize relevant relationships and drill down to the most pertinent evidence:

- Search email, cell phone data, attachments, embedded images, archives, headers and metadata
- Group and trace email and cell phone conversations, showing timelines and relationships
- Preview, cull and de-duplicate data
- Export results in a variety of formats for reporting, follow-up investigation, eDiscovery, or later use in other platforms

Intella®'s product range enables legal professionals—at firms of any size—to quickly and easily search email and ESI.

Find what you need faster than ever before!

Additional Information

- PST, OST, DBX, NSF, Mbox and IMAP can all be processed using Intella®
- Analysis of digital media including Word, Excel, PDF and Powerpoint
- Exports to Concordance, Ringtail, Summation, Relativity and i2 Analyst Notebook
- Records from mobile phone forensic examinations can be imported
- Reviewers can redact specific text, pages, or areas within a document

Check out the Intella® suite of products
