Workflow Advisory Service

10 Hours for \$1995

Integrating a new software application into an existing system can be a stressful experience. It takes time to learn how to use the software and to adapt and enhance existing processes and workflows to accommodate the new product.

To simplify this process, we have teamed up with the Spyder Forensics professional services team to offer workflow advisory services to our customers. This service is designed to augment your training by helping you apply the skills learned in your training courses to your investigations.

Schedule time with your consultant to develop efficient, standardized processes and workflows to streamline your investigations. Together, we will navigate the complexities of digital investigations using our family of products and ensure your success with Vound.
